

How to locate your routing and account numbers  
(this information will be required on the forms provided)

**Your Routing Number:**

To locate your routing number, simply look at the bottom left-hand corner of your checks. The first set of numbers listed is your routing number.

**Your Account Number:**

To locate your account number, look at the bottom of your checks, to the right of the routing number. In some instances, your account number may be listed immediately after your routing number, or it may appear after the check number.
